Professional Summary

Business Analyst and Data Analyst with hands-on experience bridging IT and business needs through data-driven solutions. Completed a full SDLC project at Malath Insurance — covering business process documentation and process flow mapping, ERD and schema design, database implementation in SQL/PL-SQL via Oracle Toad, interactive interface development in Oracle APEX, and testing of trigger automation and system integration. Also experienced in Power BI through independent projects involving DAX, Power Query, and KPI dashboard design.

Experience

Systems Analyst Intern
Malath Insurance Jan 2026 - May 2026

- Gathered requirements through direct sessions with the IT General Manager; documented the process and mapped it into a Process Flow Diagram.
- Designed an Entity Relationship Diagram (ERD) and implemented the full relational schema in Oracle Database using SQL (Toad for Oracle).
- Built PL/SQL triggers to automate business logic (e.g., automatic policy activation upon payment) and maintain audit trails across core tables.
- Wrote advanced multi-table SQL reports using joins across primary/foreign keys for management reporting.
- Developed 6 interactive Oracle APEX pages covering owner registration, policy/coverage management, and claims tracking dashboards.
- Explored Power BI by connecting Oracle SQL data to build KPIs and an interactive dashboard as part of broader training exposure.

Additional professional Power BI projects (DAX, Power Query, KPI dashboards) and full Malath project documentation available in portfolio (linked above).

Education

Bachelor's Degree, Management Information Systems Jun 2026
Prince Sattam bin Abdulaziz University

Certifications & Courses

ICDL Certification - Imam Mohammad Ibn Saud Islamic University

Data Analysis with Power BI (30 training hours) - Tuwaiq Academy

Data Analysis (Excel & Power BI focus) - Udemy

Database Management Systems - Self-directed learning

Technical Skills

- Business & Requirements Analysis: SDLC methodologies, requirements gathering, process mapping.
- Database Development: SQL and PL/SQL (Procedures, Functions, Triggers), Schema Design (ERD, DFD).
- Low-Code Development: Oracle APEX for business application development.
- Business Intelligence: Power BI (Dashboard Development, KPI Design, DAX, Power Query).
- Data Analysis: Advanced Microsoft Excel (Pivot Tables, Data Modeling, VLOOKUP).
- Office Productivity: Working knowledge of Word, PowerPoint, and Outlook.

Soft Skills

- Core Competencies: Analytical Thinking, Problem Solving, and Critical Thinking.
- Interpersonal Skills: Professional Communication, Team Collaboration, and Adaptability.
- Operational Skills: Time Management, Technical Documentation, and Attention to Detail.
